The theory in each section is that the majority shall rule, but only in the North is this theory carried into effect: in the South it is made a hissing and a by-word by the Democratic minority. Undoubtedly the ignorance The national banks, then, on an empt from taxation. Revolution and sense of personal inferiority bred in the colored mind by generations of slavery have contributed in no slight degree to the inversion of majority rule in the South, for it is inconceivable ny States were possessed of the same spirit and intelligence as their white Democratic neighbors they would tamely submit to the denial and destruction

Nor do they stop that control so long as it pleases by simply appointing county officers will-ing to commit the necessary frauds upon the ballot-box or the election returns. In this way the Democrats now retain control of two-thirds of the Southern States. No such subversion of popular rights would be possible under the township system of organization. We are well aware that to denounce the political practices of the white leaders of the Democratic minority in the South, or to point out the ab-surdity of a party which clamors in its platform against centralization and in practice totally denies the rights of local self-government, would be a mere waste of energy, and so will content ourselves with simply calling the attention of Northern readers to what, in the opinion of so competent an observer as Judge Tourgee, is the most potent cause of the curse of minority rule in the South, namely, the lack of meeting plan.—| Ex.
